This telecon is one of an ongoing series of telecons to prepare for 10 gigabit/sec e-VLBI demonstrations between NASA GSFC and MIT Haystack Observatory using a combination of network facilities including all or part of GlowNet, Bossnet, ISI-E, SuperNet, Max and GSFC/HECN.

ACTION ITEMS ARE HIGHLIGHTED IN RED.

NASA/GSFC

Kevin reported that Force10 E600 is installed and is being configured. A 10GigE link will be set up between GSFC and Ames (CA) using NLR (through McLean).

Telecon with Raptor folks

A telecon with Raptor, including MAX, GSFC and Haystack people is scheduled for 29 tomorrow (29 March) to discuss possibilities of upgrading Haystack-MAX link to 10Gbps using Raptor ER-1010 switches. There are many issues to be discussed with regard to this proposal.

GGAO

Kevin D. reported that Haystack's connection to the Mark 5 at GGAO seems to be broken. Paul Lang will investigate.

Hawaii/Germany e-VLBI transfers

PMRF has suspended connection to Kokee pending receipt of money for membership in HIC (Hawaii IntraNetwork Consortium); appear they want \$30K+ per year. Bill Wildes is working on resolving this.

Plan to start Wettzell, Germany transfers soon.

Next telecon is scheduled for Monday, 18 April 2005 at 2pm EST.
