SUBJECT: UVLBI high-data-rate configuration options

Table 2 lists the various combinations of baseband conversion equipment, recording systems and correlator playback systems necessary to record data rates from 1024Mbps to 2048 Mbps for UVLBI.

## **Equipment Key**

Table 1 describes the various pieces of equipment referred to in Table 2.

| BBC                 | VLBA or Mark 4 BBC   |  |  |
|---------------------|--|--|--|
| DBE                 | Digital backend (replacement for analog BBCs)  |  |  |
| Mk4 frmtr           | Standard Mark 4 formatter  |  |  |
| Mk4B frmtr          | Mark 4 formatter upgraded to support 2 VSI outputs   |  |  |
| VLBA sample adapter | Adapter card to convert VLBA sampler outputs to VSI  |  |  |
| Mk5A                | Mark 5A; max 1024 Mbps; optionally upgraded for SATA compatibility   |  |  |
| Mk5A+               | Mark 5A upgraded to support reading of Mk5B disks  |  |  |
| Mk5B                | Mark 5B; VSI compatible;<br>max 1024 Mbps;<br>optionally upgraded for SATA compatibility                           |  |  |
| Mk5B+               | Mark 5B with SATA and StreamStor upgrade <sup>1</sup> ;<br>2048 Mbps max record rate;<br>1024 Mbps max replay rate |  |  |

Table 1: Key to equipment referred to in Table 2

-

<sup>&</sup>lt;sup>1</sup> Upgraded StreamStor expected (but not promised) to be available early 2006

## **Configuration Options**

| Aggregate<br>rate<br>(Mbps) | Minimum<br>hardware                | #chans | chan<br>BW<br>(MHz) | Correlator Requirements   |
|-----------------------------|------------------------------------|--------|---------------------|---|
| 1024                        | 8 BBC<br>Mk4 frmtr<br>Mk5A         | 16     | 16                  | Mk5A or Mk5A+   |
|                             | 8 BBC<br>Mk4B frmtr<br>Mk5B        | 16     | 16                  | Mk5A+ or Mk5B   |
|                             | 8 BBC<br>VLBA sample adptr<br>Mk5B | 16     | 16                  | Mk5A+ or Mk5B   |
|                             | DBE<br>Mk5B                        | 16     | 16                  | Mk5A+ or Mk5B   |
| 1792                        | 14 BBC<br>Mk4B frmtr<br>2 Mk5B     | 28     | 16                  | Mk5A+ or Mk5B;<br>may require multiple passes   |
| 2048                        | DBE<br>2 Mk5B                      | 32     | 16                  | Mk5A+ or Mk5B;<br>may require multiple passes;<br>may require software<br>upgrades                              |
|                             | DBE<br>Mk5B+                       | 16     | 32                  | Mk5B or Mk5B+;<br>replay at 1024 Mbps max<br>(1/2 speed);<br>will require software<br>upgrades                  |
| 4096                        | DBE<br>4 Mk5B                      | 64     | 16                  | Mk5B or Mk5B;<br>may require multiple passes<br>and software upgrades   |
|                             | DBE<br>2 Mk5B+                     | 32     | 32                  | Mk5B or Mk5B+;<br>replay at 2048 Mbps max;<br>may require multiple passes;<br>will require software<br>upgrades |
